PROJECTS

Finance Tracker – Savings-First Personal Finance App

📅 2026 📍 Berlin, Germany

🌐 <https://trevaogwang.com/projects/savings-first-finance>

Designed and developed an interactive mobile finance product prototype that helps users connect everyday spending decisions with realistic savings plans and measurable financial progress.

- Conducted qualitative research with peers to identify challenges in budgeting, maintaining savings habits, and turning financial goals into realistic monthly plans.
- Translated the findings into product requirements, a user persona, journey map, prioritised roadmap, functional mobile prototype, and product measurement framework.
- Designed goal planning with adjustable monthly contributions, calculated completion dates, payment schedules, configurable reminders, and progress forecasting.
- Connected confirmed savings and investment transfers with transaction history, monthly budgets, available balance, and financial reports.
- Defined the North Star Metric and supporting activation, follow-through, retention, forecast-accuracy, and trust metrics.

WORK EXPERIENCE

06/2024 - 05/2025

Berlin, Germany

Working Student IT Support

Scalable Capital (Scalable Operations GmbH)

- Managed Jira Service Management workflows and resolved technical requests, communicating clear solutions to users daily.
- Coordinated end-to-end onboarding and offboarding for 20–30 employees monthly, managing device preparation, SSO, user accounts, and secure access across multiple systems.
- Tracked approximately 1,000 devices in Jira Asset Management, maintaining accurate asset records and supporting hardware lifecycle processes.
- Created and maintained Confluence SOPs and user documentation, supporting process standardisation, knowledge sharing, and the resolution of recurring issues.
- Contributed to LAN optimisation rollout covering 72 desktop monitors, coordinating implementation and improving network reliability and user experience across the office.
- Maintained Jamf Pro-managed devices and technology across six Google Meet conference rooms, resolving recurring issues and ensuring reliable workplace operations.

05/2023 - 04/2024

Berlin, Germany

Working Student IT Support

Hive Technologies GmbH

- Resolved 50+ monthly hardware, software and network requests across Windows, macOS and ChromeOS environments, achieving over 80% SLA compliance.
- Coordinated device logistics for remote employees, including preparation, shipping, replacements and returns through DHL and UPS.
- Installed and supported laptops, mobile devices, printers, meeting-room hardware and workplace peripherals, minimising disruption to daily operations.
- Assisted with device preparation and SSO-integrated account setup for new employees across distributed teams.
